- JS / TS | PHP | Python
- React / Redux / Context API / Mobx / Apollo / hooks
- Yii2 / Symfony / Laravel / CodeIgniter
- Django / Flask
- JHipster / Spring Boot
- AWS: EC2 / Lambda / Fargate / ECS / SNS & SQS / RDS

Key Skills

- Creative and Building Frontend Page
- TDD / BDD
- Web & Cross-platform development
- Fast Turnaround
- Github / GitFlow

Full Stack Developer

Consalata Mar 2016 - Feb 2018

- Created an API for a sports related mobile app using a Slim framework. Built an event promoting site in Symfony4 with heavy usage of a Cloudinary API for image processing.
- Developed a real-time video streaming solution with various billing options, using Symfony2, Wowza Media Server, Redis and NodeJS.
- Created an online advice web solution prepared for law companies; basically, it is a web form that could be implemented on every web page and allows users to request legal advice. The bigger part of the project was administration panel that allows law companies to manage the advice requests, a manual and automatic internal email system, and payment solutions.

Full Stack Developer

Saburly Feb 2014 - Feb 2016

- Developed responsive mobile web applications with AngularJS.
- Mentored experienced developers who were new to JavaScript.
- Analyzed front-end technological options (CSS frameworks, Protractor, design patterns, and more) and helped the team settle upon our technology foundation.
- Led the development of Sears eCoupon application with a similar criteria and oversaw its deployment and integration with Sears' subsidiary domains. I oversaw its deployment and integration with Sears' subsidiary domains.
